The index-based fuel surcharge is calculated on the sum of the freight invoice and applies to our contract customers. The fuel surcharge applies to all pallet services, but not our additional services. The level of the surcharge is adjusted every week, and will be announced asap. The percentage and intervals of the surcharge in the table below are adjusted every year.

Invoicing

The fuel surcharge will be shown as a separate entry on our invoice. The level of the fuel surcharge is adjusted weekly, based on the average consumer price of diesel one month prior to the effective date. The average consumer price of diesel is published weekly by the European Commission Directorate for Energy and Transport in "Oil Bulletin (with taxes)". The price in the column "Gas oil automobile" and on the line "CE/EC/EG Euro Area 19 (€) (V)" are used.» Oil Bulletin (PDF) at
