30 kg to other destinations

Min. weight 150 grams

3. FREIGHT CALCULATION

4. DELIVERY

4.1 Delivery procedure

Delivery is carried out on non-holiday weekdays, between 08:00 and 17:00 in Sweden and Finland, and between 08:00 and 16:00 in Denmark and Norway. The shipment is delivered to the recipient's door, i.e., front door, gate or goods reception, against signature. In other countries, delivery is carried out according to local conditions.

If the recipient's email address and/or mobile number has been provided at booking of the shipment, the recipient will be notified when the shipment is on its way and when loaded for delivery. Notification is primarily sent via email. If no email is available, SMS is used as a secondary channel. Notification may also be sent via Bring's mobile app, provided the recipient has a user account in the app. Notification applies only to shipments to Sweden, Denmark, Norway and Finland.

4.2 Recipient-selected delivery choices

4.2.1 Recipient-selected Flex Delivery

Delivery without the need for someone to be present to receive or sign for the shipment is available in Sweden, Denmark, and Norway. The shipment is placed at the door or another designated location at the delivery address and registered as delivered.

4.2.2 Redirect to pickup point

Change to delivery via service point or parcel locker is available in Sweden, Denmark, and Norway. The parcel is handed out according to the terms of the service PickUp Parcel, with some minor differences. In Sweden, any person may collect the parcel by presenting the notification/pickup code along with a valid ID. In Denmark, the person collecting the parcel at a service point is considered legitimate by simply presenting the parcel's notification/pickup code.

4.2.3 Restriction of delivery choices

If the Customer does not wish to allow the recipient access to delivery choices as described above, the Customer must book the shipment with an additional service that blocks this, such as signature requirement. Delivery choices that are prevented by the selected additional service will then no longer be available to the recipient.

4.3 Obstacles to delivery

4.3.1 Sweden, Denmark

If the shipment cannot be delivered, a new delivery attempt is normally carried out the next delivery day. Otherwise, the recipient will be notified and asked to book a new delivery attempt.

4.3.2 Norway

If the shipment cannot be delivered, delivery is made to a pickup point for hand-out to the recipient. Shipments of more than four (4) parcels cannot be delivered to pickup point and will be returned to the sender.

4.3.3 Finland

If the shipment cannot be delivered, two different procedures are applied:

- According to above as for Sweden and Denmark
- Delivery to a pickup point for hand-out to the recipient (distribution via external partner)

4.4 Storage time and return

4.4.1 Terminal

After two delivery attempts have been carried out, or if booking of a new delivery attempt has not been received within 14 days from the first arrival registration at the terminal, the shipment is sent in return, at the Customer's expense.

4.4.2 Pickup point

For the service to be performed correctly and with high quality, it is crucial that the recipient's full address is provided accurately in the EDI, according to the recipient country's standard and format.

For parcels to Sweden, Denmark, Norway and Finland, a preferred pickup point, i.e. service point or parcel locker, shall be specified in the EDI and selected via API call to Bring's current database of pickup points. No separate API integration is required for parcels booked via Mybring. If no pickup point is provided, one will be assigned based on the recipient's address in the EDI. For parcels destined to other destinations, a pickup point will also be assigned based on the recipient's address in the EDI.

Delivery is carried out on non-holiday weekdays between 08:00 and 17:00, to the recipient's mailbox. The recipient is notified via SMS, email, or app when the parcel is on its way and upon completed delivery. The recipient's mobile number and email address must be provided in the EDI.

If the parcel does not fit in the mailbox, it will normally be hung in a bag on the mailbox or door handle. If the recipient's door is located indoors, the parcel may instead be placed outside the door. This delivery procedure is a part of this service and cannot be opted out of. Once delivery has been completed in this manner, the goods and their packaging are considered to have been in visibly good condition. The parcel is registered as delivered upon delivery, which is considered sufficient proof that delivery has taken place. Bring is not liable for any damage or loss that occurs after delivery.

4.2 Obstacles to delivery

If the parcel cannot be delivered to the recipient's mailbox or placed at the mailbox or door, it will be delivered to a pickup point for PostNord.

3. FREIGHT CALCULATION

Freight is calculated per parcel based on shipping weight, i.e., the greater of the actual weight and the volumetric weight. The volumetric weight is determined using a conversion factor of 280 kg per m³ for shipments to/within Sweden and 200 kg per m³ to/within Denmark. The freight calculation is based on the shipment's total dimensions and weight, including load carrier/pallet and packaging.

For special goods, shipping is calculated based on the cargo space or number of pallet spaces the goods occupy. Special goods refer to large goods which, due to its nature, packaging or other reasons, cannot be loaded together with other goods.

The Customer is responsible for ensuring that the dimensions and weight are correctly specified for each parcel/unit. Bring reserves the right to verify this information and, in cases of deviations, adjust the shipping price and charge additional fees.

4. SELECTION OF DELIVERY DATE AND TIME

Delivery date and time window shall preferably be specified in the EDI when booking, through API calls to Bring's delivery matrix applicable at any time. If delivery date and time window is missing in EDI, the recipient will be notified and asked to book a date and time for delivery.

5.4 Obstacles to delivery

If the shipment cannot be delivered, the Customer will be contacted to agree on a possible new delivery attempt. A fee for new delivery attempt is added. For delayed or failed delivery that is due to the Customer or the recipient, Bring reserves the right to charge the Customer for storage and any other additional costs incurred.

Bring's staff has the right to cancel a delivery if there is a risk of damage to goods, inventory, property or personal injury, as well as if the vehicle cannot be driven in a traffic-safe and legal manner.

5.5 Storage time and return

1.4 Individual Verification (1134)

In Sweden, delivery to another person is accepted if they present both their own ID and the specified recipient's ID. Any possibility for Flex Delivery and delivery against power of attorney is blocked. For B2B parcels redirection to pickup point is also blocked.

1.5 Signature Required (1280)

Signature is required upon delivery. A person other than the specified recipient can also receive the shipment and sign for it. Any possibility for Flex Delivery and delivery against power of attorney is blocked. For B2B parcels redirection to pickup point is also blocked.

1.7 Flex Delivery (0041)

Contactless delivery. The shipment is delivered outside the recipient's door or at another specified location on the delivery address, without requiring anyone to be present to receive or sign for the shipment. Any entry code or intercom, required to access the delivery location, should be provided in EDI.

At delivery Bring registers the shipment as delivered, which is considered sufficient proof of delivery. Bring may also take a photo documenting that delivery has been made. Once the shipment has been delivered in this manner, the goods and their packaging are considered to have been in visibly good condition. Bring is not responsible for damage or loss occurring after delivery.

1.8 Delivery Indoors (0039)

The shipment is carried to a specified location according to the provided instructions in the EDI. Delivery is made to a single location, regardless of the number of parcels. The maximum weight per parcel is 35 kg.

If the additional service is combined with the service Business Pallet, the pallet is split, and each parcel is carried to the specified location. The packaging and the pallet are returned to Bring's terminal for recycling or destruction.

- The path to the specified location must be clear and free from obstacles.
- For delivery more than four (4) floors up, access to a lift is required.
- The recipient is responsible for protecting any fragile floors.

If the conditions are not met, the delivery will be made without carrying the parcels/items in. Any additional delivery attempt (in case of obstacles at the first attempt) will also be made without carrying the parcels/items in.

1.11 Telephone Notification (1149)

The driver calls the recipient approximately 30-60 minutes before delivery. One (1) notification attempt is made. A delivery attempt is made even if the recipient cannot be reached by phone. For parcels handed in to a parcel locker (available only in Sweden), the sender should write a numeric label free code directly on the parcel.

If a service point cannot print the shipping label, the sender is instead asked to write a numeric label free code directly on the parcel. If the sender does not have access to the parcel's label free code, the service point can provide this to the sender based on the parcel's QR code.

1.14 Limited Quantities (0003)

Mandatory additional service for shipments containing limited quantities of dangerous goods ("LQ") according to the ADR regulations. The Customer is responsible for ensuring that the sender complies with applicable regulations, including requirements for quantity, labelling, and packaging. Compensation is based on the full value of the goods, including invoiced value, freight, insurance premium, and any potential profit and customs duties, and carries no deductible. The maximum compensation is 10,000 EUR per parcel and 100,000 EUR per pallet.

Cargo Insurance can be arranged for most types of goods, except mobile phones and alcohol, and applies to most countries, with some exceptions (e.g. Iran, Iraq, Afghanistan).
